American Hardware STORES
American Best Quality Paints you're gonna love what happens
HINT:
HOW TO BUY PAINTS
The most popular question our customers ask is, "What is the difference between the labels and prices of interior paint you handle?" Actually, we can answer that in one sentence: The difference is in the hidebility, washability and in the number of colors available.
There are many instances when lower priced paints can be used with good results, but we always try to recommend the Best Quality American Paints. We do, however, question the customer to determine whether lower priced paints, such as those in our Economy or Standard lines, would fit their needs and save them money.
Our unconditional guarantee on American Paint applies to all three grades, so our general advice is to buy the best paint you can afford from the most dependable company you can find - - like POE HARDWARE CO. for instance.

Music Lessons For Young Children

Leading educators agree on the need for music training for children when they're most open to learning and feeling the many elements of music.

And many of those educators enthusiastically endorse the Yamaha Music School, which has successfully introduced over a million-and-a-half four to six-year-olds to music.

The school doesn't start a child out on a particular instrument.

Its goal is not only performance, but also understanding and appreciation of music.

It focuses on ear training, the most valuable basic training in music (and the one indispensible course required by master teachers, music conservatories, conductors, etc.).
